Products & Technologies

axxon  ONE

Video Management System

Axxon One is limitlessly scalable video management software that combines comprehensive support for 10,000+ IP devices and a streamlined user interface. Axxon One offers unique value through features like smart forensic search in recorded video and customizable video analytics powered by artificial intelligence.

AI Video Analytics

Full-cycle development of custom and general-purpose neural network analytics.

Smart Search

We are the pioneers in smart search technologies for recorded video that enable you to quickly find recorded events of interest.

axxon  PSIM

Physical Security Information Management System

Axxon PSIM is the best choice for managing hundreds or thousands of cameras in a custom-built security system, or when you need CCTV integrated with access control, perimeter protection, fire and security alarms, and sophisticated functionalities such as facial recognition, ANPR, and POS or ATM monitoring systems.

Integration

Comprehensive support for dozens of physical security systems, thousands of IP devices, and standard communications protocols.

Axxon VSaaS
DATACENTER

VSaaS Software Platform

Axxon VSaaS Datacenter is a software platform that enables telecoms carriers, cloud service providers, integrators, etc. to build their own branded, hosted or hybrid, hardened and AI-powered VSaaS solutions, tailored to meet the specific business and security needs of diverse industries and public institutions.

Automation

Flexible configuration of complex system response scenarios with GUI tools and a scripting programming language.

AI Video Analytics

Custom and General Analytics

We provide ready-made neural networks for common tasks such as human/vehicle detection, human posture recognition, and fire/smoke detection under standard conditions. As well, we train AI for specific conditions and tasks: unusual viewing angles, difficult lighting, detection of particular objects, thermal camera use, etc.

Full-Cycle Development

We have at our command a full cycle for AI video analytics development. This enables us to implement a turnkey AI training program to meet your specific needs. To achieve the highest possible accuracy, we leverage your system with neural networks trained using videos from your actual site and suited to your specific tasks.

AI Video Analytics Tools

Behavior Analytics

Detection of suspicious or abnormal behavior by recognizing certain human postures.

Fire and Smoke Detection

Early detection of fire hotspots in areas where regular sensors are ineffective, e.g., in open spaces.

PPE Detection

Workplace safety enforcement by detecting people wearing no personal protective equipment.

Object Detection

False alarms reduction with accurate detection of specific object types such as humans or vehicles.

AxxonSoft Today

الشركاء الاستراتيجيون Strategic Partners

Here we are! Our first steps were in late 2009, when a group of colleagues decided to start their own project. We have specialized since then in the field of ERP systems, as the team was always keen to update the technologies used and keep pace with developments. We later decided to expand the facility's framework to include technical solutions services Website and application design and others.

كايرو
CAIRO7
